

Serial No. 10/692,163

Amendments to the Specification

Please amend and replace paragraph [0026] in the specification as follows. No new matter has been added by these amendments.

[0026] Stain removal liquid 102 can be combined with air source 404 in a variety of different manners. For example, stain removal liquid 102 may be included within a pressurized canister for providing air source 404. Alternatively, a hose can be used to couple stain removal liquid to pressure port (aka nozzle) 402 such that stain removal liquid 102 is sprayed through fabric 104, facilitating the removal of stain 106.
